Alexan, Jan. 30, 1862.

Alexanan Brady has been here at the expense of the State, brought up by the Sergeant-at-Arms on Tuesday to testify before the Committee on Privileges, and inform them how he proceeded to buy up the last Legislature. The committee were unable to hear him on Tuesday night, owing to the debate on taration in the Assembly, and isst-evening Mr. Brady appeared before the committee, stating that he was quite unwell, and asked that his case might be postponed for a few days. He was given until next Tuesday evening to recover, when the committee proceeded to inquire into the Post Office bill. They had one witness before them for two hours, but nothing has transpired as yet worthy of notice.

The contest for the nomination of Superintendent of Public Instruction took a very singular turn yesterday, and shows how early the current is changed and an op-

do shows how early the current is changed and an op-site result from that anticipated by everybody is orked out. There was probably not a half a dozen per-ns at the State capital until a late hour on Tuesday ening that claimed a chance for Rice. It was the diversal impression that Keyes had it all his own way. e first symptoms of any other result were discovered Raymond made his famous speech on taxation. A desporate effort was then commenced, the charge made and reiterated from one to another that Keyes was Raymond's candidate. The too was saunded, the drill commenced, and men, who had from the first refused to consider the question in a party view, were brought under its influence and arrayed against Keyes on that the same. However, thus cont. Mr. Keyes may have been However innocent Mr. Keyes may have been connection with Raymond, the cry was started, and he was made to suffer. He was made a target of to hit Raymond, and was laid out; but we wait for further developements to decide whether Raymond has also been finished and put under. The change of front was made sterlay, and a number of members who had been nong the most realous advocates of the election of

s turned around for Rice, and thus nominated him. Both booses of the Legislature met in joint convention his morning and ratified the a miniation of Mr. Rice, he eceiving one hundred and two votes-the same number od in the caucus yesterday. Mr. Rice was the first Superintendent of Public Instruction under the present aw. He is an old whig, but trained under the anti-Weed party, and was defeated by the latter portion of the party with Mr. Van Dyke. In the recent issues he has known as a Greeley republican, was a member of the last Legislature, and one of the leaders in the movement to make Greeley United States Senator ha

of the last Legislature, and one of the leaders in the movement to make Greeley United States Senator has been identified throughout with that faction of the republican party. All of Greeley's friends were zealous in their support of Rice, and it is understood that Greeley in person on yesterday changed the nine Cavort votes from Reyes—where they had made up their minds to go after leaving Cavort—to Rice; Greeley being here estensibly to lecture, but in reality to assist Rice, carried his point. The first visit of Greeley to Albany has been attended with success, and this may encourage him to come again and pit hamself against Raymond.

George R. Perkins, the nominee for Regont of the University, is a straight democrat. He was in the State Engineer and Surveyor's office under Van R. Richmond, and was removed when Mr. Taylor took possession of the office on the 1st of January. He has, however, been an active advocate of the Normal School, and has taken great interest in it; he is every way fitted for the opition of Regent, and the republicans exhibited their good sense in nominating him. The office, however, has generally been an ortaneerial one and no pay, but we mistake the person if Mr. Perkins does not work out some good result from the position.

We had several entertainments last evening. Horace Greeley delivered a lecture at Tredeel Hall, and was well attended. Royal Theips gave a dinner to the chairmen of the several Assembly committees, which was really an entertaining affair.

The bril to confirm the ordinances of the New York Common Council in reference to the appropriation for the families of the volunteers came up in the Committee of the whole this morning. Mr. Codelington rose to an explanation, and said that he had been accused of being opposed to considering these ordinances out of order. But he would say here that he did not envy the man whose voice or vote would keep fifteen hundred open mouths from receiving foed. The ordinances were brought before the Committee of the Committee of the Subscor

passed finally to-morrow.

There was one of the most interesting sessions in the Seante this morning that we have had since the organiza-

gress. They are willing to provide mass meetings for bimosmbe talk when they have discharged their duties at Washington.

There is another story in circulation here which it has been my fortune to trace to its fountain head, and prove it to be one of the binekest End of lies, got up for evil intent. It is this: A story was industriously circulated last night that Seward was about to leave the Cabinet, and that the President was going to call Sanator Harris to that position. It was also added that it was supposed to be for the purpose of rewarding Mr. Harris for his action in reference te Sanator Bright; thus adding to the story a stab at the President. It is sufficient for me to say that I traced this whole affair directly to the lips of a notorious emascipation and abolition against him their power to defame the President and manufacture public opinion against him. No other statement is necessary to convince the public of the untrath of the story.

The evening session of the Assombly was taken up in debating taxation. Rev. Mr. Pryna was the speaker. He pursued the same line of argument adopted by Mr. Huiberd were so worded that they contained an implied stab at the administration. He argued that pieces of iron would be good legal tender, provided Congress passed a law making them a legal tender.

Mr. Stotson maxt spoke, reviewing the rise and progress of the reballion—delaring that money was necessary to prosecute the war, and the question was, flow should it be raised? Should stocks and notes be issued without a pledge of a direct tax to meet the interest, or based upon a tax? One set of resolutions favored pledging the tax, and the other to leave the proceeds of tax to the action of future Congress, or by placing the proceeds of the tax where treath of the second or any other purpose? He favored the original resolution, deeming the pledge of a tax to pay the interest the only way that funds could be claimed.

Mr. Pierce next spoke in favor of the original resolution.

pay the interest the only way that funds could be obtained.

If Pierce next spoke in favor of the original resolutions. He said that it was admitted that there was but the little difference in the sub-tance of the resolutions, but in the phrancology the question there was, Should this Likslature speak in an emphatic tone or adopt a mile and water policy? Should they adopt resolutions that will be mile for be us, or those that would gird up the loins of our minutes of Congress? He read from Spainding's speech in Congress, arguing that he appealed to this State to come to the researc. We were asked to speak on this question, and should not go trembling and shaking before Congress. There are enough of that kind of cattle there already. He further argued that the only safe mode, the only plan that could be whelly relied upon, was the tax basis, enough, at least, to pay the interest. He turned the cry of disloyally upon the Reymond side of the house.

Mr. Rice will make no changes in the School Bepartment suttlespring. He will then appoint Mr. Cavert his deputy. This is the arrangement that secured him the nine Cavert votes on the second ballot.
